Eat Wisely and Be Physically Active: Take Control of Type 2 Diabetes

Diabetes can be managed!

Balancing the food you eat with exercise and medicine (if prescribed) will help you control your weight and can keep your blood sugar in the healthy range. This can help prevent or delay complications. Many people with diabetes live long and healthy lives.

If your weight is a concern consider joining MOVE!, a comprehensive lifestyle intervention targeting weight loss through dietary changes, physical activity and improved weight management behaviors. This approach, particularly when delivered in a group format, has been shown to be effective for managing diabetes.

Stay one step ahead of your diabetes with these resources.
