# **Staying Healthy: Recommendations for WOMEN**

The Veterans Health Administration (VHA) aims to help you stay healthy. The table below lists the **preventive health services** (screening tests, medications, health counseling, and vaccines) that VHA recommends. Screening tests are used to look for health conditions before there are symptoms. These recommendations apply only to adult women of **average risk**. You are a woman of average risk if you have **no personal or family history or symptoms** of the conditions listed below. If you are having symptoms of a condition, please talk with your provider.

### Which preventive health services are recommended for average risk women in my age group?

Green: Recommended

Yellow: Recommended for some women – talk with your provider

Red: Not recommended (NR)

#### **SCREENING TESTS FOR AVERAGE RISK VETERANS**
